Users

1. As a nursing student, I want to register so that I can use the app

Profile management

1. As a nursing or exercise student, I want to create and manage multiple patient profiles so that I can track and analyse dietary data for each individual.
2. As a student, I want to input patient demographics (name, age, gender, ethnicity) so that nutritional needs can be personalized.
3. As a student, I want to record patient body measurements (weight, height) in either metric or imperial units so that calculations are accurate.
4. As a student, I want to log medical conditions and dietary restrictions for each patient so that nutrition plans are appropriate and safe.
5. As a student, I want to set each patient's activity level so that their energy expenditure can be estimated.

Food intake logging

1. As a student, I want to log food intake for each patient so that their dietary records are complete.
2. As a student, I want to search for food items from a database to streamline the data entry process.
3. As a student, I want to input portion sizes, date/time, and meal type so that each patient's intake is accurately recorded.
4. As a student, I want to manually add foods or recipes if not found in the database so that no intake data is missed.

Nutritional analysis

1. As a student, I want to view each patient's nutrient intake compared to RDIs so I can assess how well their diet meets their needs.
2. As a student, I want to see breakdowns of energy, macronutrients, and micronutrients to understand each patient's dietary profile.
3. As a student, I want the system to flag nutrient deficiencies or excesses so I can make recommendations or note concerns.
4. As a student, I want to generate daily, weekly, or custom reports for each patient so I can track trends and report findings.
